

Creating a Quick Video in Canvas:

To utilize this quick video option, you'll need to have a webcam available. Once you've accessed the page, announcement or discussion board you can follow the following steps:

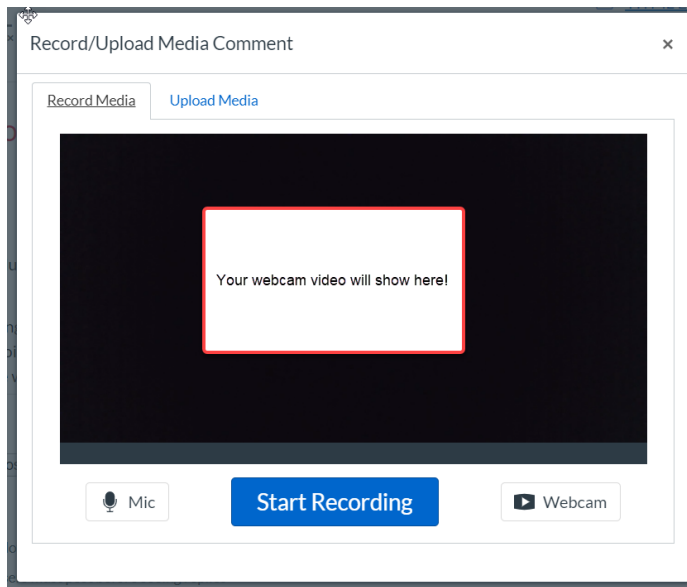

1. Click the record/upload icon as shown below:

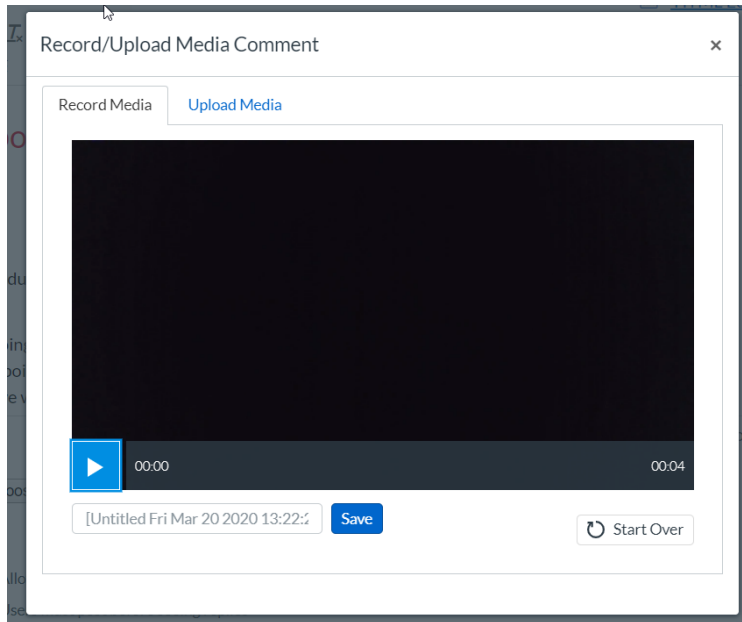

2. You will need to allow access to your WebCam:

3. Then can select The Record Media tab and click "Start Recording" you are ready.

4. Once you're done, you can Stop the Recording and Save it or Start over.

5. Your video will then be embedded into the window (Rich Content Editor).
6. You can save the video to the page by clicking **“Save & Publish”**

Other Options

While this tool is quick and easily integrated into Canvas, there are a few other free tools you can use as well. These tools are great for uploading quick videos in announcements, assignments and discussion boards.
